Data Trends are produced by the Research and Training Center for Children's Mental Health, Louis de la Parte Florida Mental Health Institute, University of South Florida, Tampa. Data Trends are funded by the Center for Mental Health Services, SAMHSA, U.S. Department of Health and Human Services. There are two Data Trends products: 1) Summaries, which detail recent, published articles on systems of care for children with emotional and behavioral disabilities and their families, and; 2) News Briefs, which highlight related items or events of interest to the field.

This News Brief alerts you to a new book in the Systems of Care for Children's Mental Health Series, published by Paul H. Brookes. Edited by Mario Hernandez, Ph.D., and Sharon Hodges, Ph.D., of the Louis de la Parte Florida Mental Health Institute, "Developing outcome strategies in children's mental health" provides an opportunity to learn what strategies have worked for systems and agencies of all sizes across the country as the authors share their challenges and successes in tracking information about the populations they serve, the services provided, and the results achieved. The table of contents for "Developing outcome strategies in children's mental health" is available at the following link:
