Subject: FW: Data Trends> News #055

From the Research and Training Center for Children's Mental Health,
Tampa, Florida...

This News brief alerts you to the following article: Addis, M. E.
(2002). Methods for disseminating research products and increasing
evidence-based practice: Promises, obstacles, and future directions.
Clinical Psychology: Science and Practice, 9(4), pp. 367-378.

The author considers two commonly offered models for increasing the use
of research products in clinical practice: (a) those that attempt to
disseminate specific treatments, and (b) those that seek to disseminate
a general scientific stance toward all clinical activities. Both models
are discussed in relation to their "promises, associated obstacles, and
future directions that should help in achieving particular dissemination
goals" (p. 368).

The article is available to subscribing individuals or institutions at:

Data Trends are produced by the Research and Training Center for
Children's Mental Health, Louis de la Parte Florida Mental Health
Institute, University of South Florida, Tampa. Data Trends are funded by
the Center for Mental Health Services, SAMHSA, U.S. Department of Health
and Human Services. There are two Data Trends products: 1) Summaries
(ISSN# 1537-0399), which detail recent, published articles on systems of
care for children with emotional and behavioral disabilities and their
families, and; 2) News briefs (ISSN# 1537-0402), which highlight related
items or events of interest to the field.
